

NMEA2000 for MAN engines Demonstration Day @ Böning USA

Dear Customers,

We managed to borrow MFDs (multifunctional displays) from Garmin, Raymarine, Furuno and SimRad, and we are organizing a demonstration for owners and captains, to explain how to set up the MFDs to show MAN engine data and alarms via NMEA 2000.

We will also demonstrate our new fuel management feature, that allows the captain to find the "sweet spot" for best speed and best fuel efficiency.

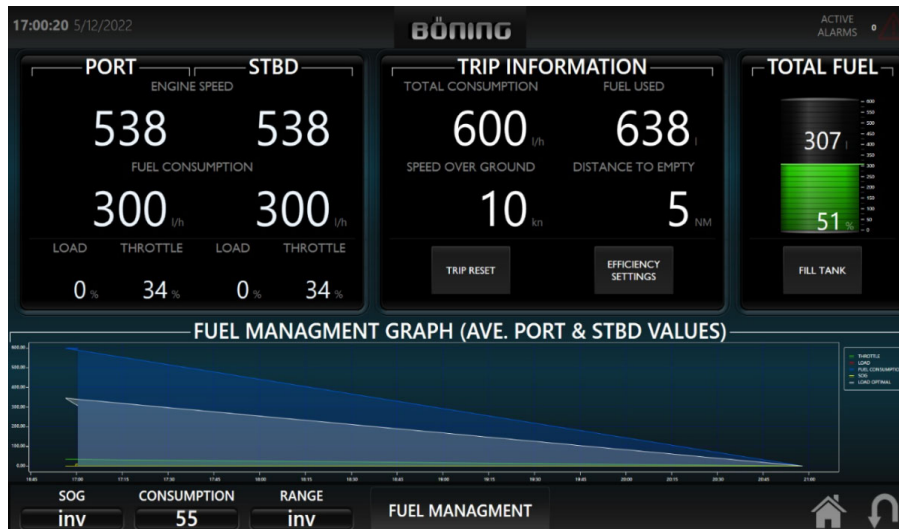

The demonstration will be done at our office in Boca Raton next Friday, 06/10, from 8:30am to 11:30am. You can arrive at any time and we will be available to explain all features and answer questions.

Please, confirm your attendance until 06/09:

Phone: (561) 372-9894

We hope to see you soon.

Böning USA Team
