

Boat Show Season

Dear Customers,

Thank you for the warm welcome back from our hiatus in July, we received some great feedback on the August newsletter and are excited to share even more news from the Böning world in this edition.

Beginning with a quick recap of an event-packed month, we will then share with you some recent project references.

Finally, the technical session of this newsletter will introduce a brand new device, the AHD-R015.

Topics:

- [Project Reference](#)
- [Event Re-cap](#)
- [New junction box for marine engines](#)
- [Böning demo's on your vessel](#)
- [Technical Session](#)

We hope you enjoy the reading.

Project Spotlight

New Merritts 110 Sportfish with Böning B:MACS

This Böning solution allows the customer to have the vessel monitoring system visible on the MFD. The visualization is displayed through our Böning app available on Garmin 86xx, Raymarine Axiom, and Furuno TZT3. This specific system was developed for tank monitoring and sewage automation.

Böning at SMM Hamburg

maritime industry calendar.

Böning presented the B:MACS family of products, a solution for all types of vessels for Monitoring Alarm and Control Systems.

Böning USA project engineer, Juan Rios, represented Böning USA at the show, which took place in Hamburg in the beginning of September.

Böning at Cannes Yachting Festival

Founded in 1977, the Cannes boat show takes place in the beautiful French city every September and showcases almost 600 boats, including motor yachts, superyachts, catamarans, tenders, and sailing yachts.

Böning Italia at the Salone Nautico Genoa 2022

Böning Italia exhibited at the traditional Salone Nautico.

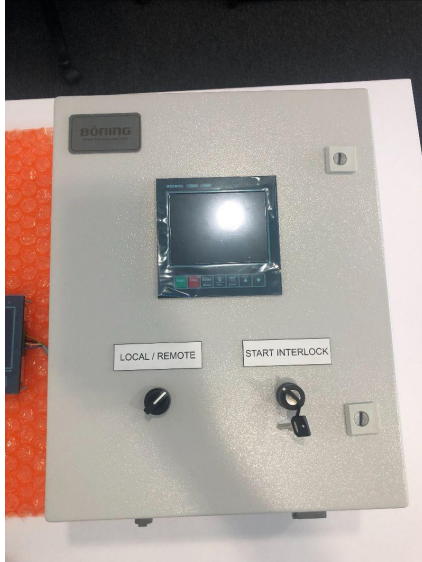

We would like to thank everyone who stopped by to speak with us at the shows all over Europe this month.

If you missed us at these past shows you still have more opportunities to meet with us this year.

Böning USA will be attending the Ft. Lauderdale International Boat Show in October as well as the WorkBoat Show in New Orleans in December.

New junction box for marine engines

Böning USA recently designed a new junction box suitable to monitor all kinds of marine diesel engines.

The Böning AHD 514 Junction Box is delivered with Deutsch connectors, for easy installation onboard the vessel.

A sensor package can be supplied as optional.

Private Demonstration on your Böning System

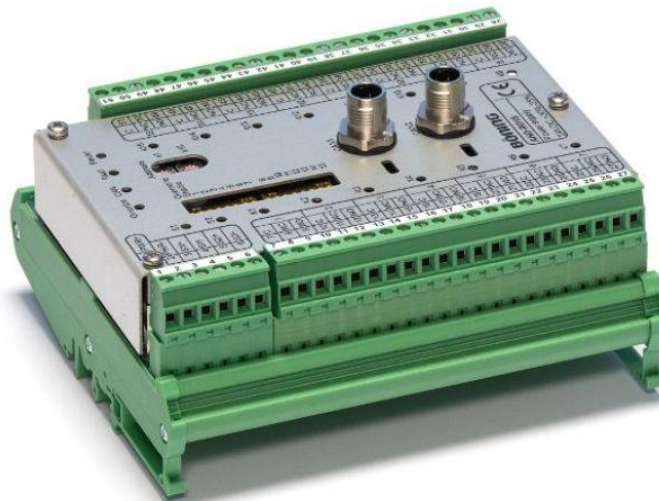

We had the pleasure of walking our customers through their brand new Böning system and demonstrated all of its capabilities.

Our customers had the opportunity to touch and test our products, as well as ask technical questions.

If you are interested in a private demonstration on your vessel please send us an e-mail by clicking the button below

Technical session: Introducing the new AHD- RO15

The new AHD-RO15 is the product of Böning's devotion to innovation and product development. Always looking to stay ahead of demand, the AHD-RO15 provides a streamlined relay solution for smaller systems. With the AHD-RO15 you can reduce your footprint as well as have the relay controls and information directly on the Böning CAN Bus.
